Appendix A — General obligation for all persons .............................................................................11
1. Explanatory Statement

This End of Waste (EOW) code for abattoir effluent pond sludge and crust has been issued by the chief executive in accordance with section 159 of the Waste Reduction and Recycling Act 2011 (WRR Act).

This EOW code states when the abattoir effluent pond sludge and crust becomes a resource and any relevant requirements and/or conditions for its use. If the resource is not being used in accordance with the relevant requirements and/or conditions of this EOW code, or another type of permit that allows for its use, it is considered a waste under section 13 of the Environmental Protection Act 1994 (EP Act) and must be disposed of appropriately at a facility that is lawfully able to receive the waste.

2. Guidance

2.1 Resource use versus activity

An EOW code states when a waste stops being a waste following any necessary processing or treatment. A waste becomes a resource when it has been determined to meet the requirements of an EOW code. It may be necessary to treat or process the waste prior to that point. An Environmental Authority (EA) under the EP Act is required where an activity being undertaken triggers the threshold for any environmentally relevant activity (ERA). This means that treating or processing the waste to meet the resource quality criteria under the EOW code may require an EA under the EP Act if the activity meets the threshold for an ERA.

2.2 Resource versus waste

A waste that has been considered a resource under an EOW code is considered a resource only for the use(s) approved in an EOW code. If the resource does not meet the requirements of the EOW code and/or is not used in accordance with the EOW code, it is not deemed a resource. It remains a waste and must be managed in accordance with waste management requirements under the EP Act and the WRR Act and their subordinate legislation.

A resource approved under an EOW code is deemed to be a waste again, if it is disposed of at a waste disposal facility, or if it is deposited at a place in a way that would, apart from its use approved under an EOW code, constitute a contravention of the general littering provision or the illegal dumping of waste provision under the WRR Act.

2.3 Failure to comply

It is an offence under section 158(1) of the WRR Act for a registered resource producer to produce the resource, or use, sell or give away the resource if they do not comply with the requirements under an EOW code. Further, it is an offence under section 158(2) of the WRR Act for a person to use the resource in a way, or for a purpose, that does not comply with an EOW code. These offences carrying a maximum penalty of 1,665 penalty units for an individual and 8,325 penalty units for a corporation.

Please refer to Appendix A of this EOW code for general obligations for all persons operating under this EOW code, which includes resource users.

2.4 Lawfulness of the activity

The issuing of this EOW code for the use of a resource does not warrant or imply the lawfulness of the activity under all legislation, or that approvals necessary under other legislation have or will be approved. It is the

---

1 The value of a penalty unit is stated in the Penalties and Sentences Regulation 2015 (Qld).
responsibility of the registered resource producer and resource user to identify and obtain all other approvals necessary for the relevant activities.

3. Period of this EOW code
This EOW code takes effect from DD MM YYYY and remains in force until it is amended, cancelled, or suspended by the chief executive².

4. Waste to which this EOW code applies
This EOW code applies to abattoir effluent pond sludge and crust generated from aerobic and anaerobic effluent ponds at an abattoir facility. The abattoir effluent pond sludge and crust becomes a resource when the requirements and conditions under this EOW code are met.

5. Person to whom this EOW code applies

5.1 Registered resource producers of the resource
5.1.1 A registered resource producer for this EOW code must comply with the stated registered resource producer requirements in Section 6 – Registered Resource Producer Requirements.

5.2 Resource users
5.2.1 The resource user must only use the resource in a way, and for a purpose allowed under this EOW code.
5.2.2 The resource user must comply with the stated conditions of use in Section 7 – Conditions of Use.

² If an EOW code is to be amended, cancelled or suspended, the chief executive will provide an opportunity to make written submissions by providing a proposed action notice to the registered resource producers; and publishing the proposed action notice on the chief executive’s website.
6. Registered Resource Producer Requirements

<table>
<thead>
<tr>
<th>Registration under this EOW code</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>(6.1)</strong> Prior to operating under this EOW code, the producer of the resource must register with the chief executive by giving a notice in the approved form(^3) to become a registered resource producer for this EOW code.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Approved resource</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>(6.2)</strong> The approved resource is abattoir effluent pond sludge and crust that complies with Requirement (6.3) of this EOW code.</td>
</tr>
<tr>
<td><strong>(6.3)</strong> The registered resource producer must not use, sell or give away the resource unless it complies with all of the following criteria and quality characteristics:</td>
</tr>
<tr>
<td>a) is generated from aerobic and anaerobic effluent ponds at an abattoir facility; and</td>
</tr>
<tr>
<td>b) contains moisture content at less than or equal to 25%.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Information to be provided</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>(6.4)</strong> The registered resource producer must provide the following to the resource user upon each time the resource is supplied for use:</td>
</tr>
<tr>
<td>a) a copy of the EOW code for Abattoir Effluent Pond Sludge and Crust (ENEW07617019)(^4);</td>
</tr>
<tr>
<td>b) the registered resource producer’s business or individual’s name, ABN and address; and</td>
</tr>
<tr>
<td>c) confirmation in writing that the resource being supplied is compliant with the requirements of this EOW code.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Records</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>(6.5)</strong> The registered resource producer must keep the following records for each load of the resource provided to a resource user:</td>
</tr>
<tr>
<td>a) origin of the resource (e.g. address, lot on plan and/or GPS coordinates);</td>
</tr>
<tr>
<td>b) quantity (in tonnes) of the resource supplied;</td>
</tr>
<tr>
<td>c) date of dispatch of the resource; and</td>
</tr>
<tr>
<td>d) business or individual’s name, ABN and address of the person receiving the resource.</td>
</tr>
</tbody>
</table>

| (6.6) All records required to be kept by the registered resource producer under this EOW code must be: |
| a) kept by the registered resource producer for a period of not less than five (5) years; and |
| b) provided to the chief executive upon request and in the format requested and in the time period specified. |

---

\(^3\) The approved form, Registered Resource Producer for an EOW code, is available on the Queensland Government website at [www.qld.gov.au](http://www.qld.gov.au), using the publication number (ESR/2018/4082) as a search term.

\(^4\) This can be a physical copy, an electronic copy or a link to the chief executive’s website where this EOW code is available.
7. Conditions of Use

**Notification under this EOW code**

(7.1) Prior to operating under this EOW code, a **person** who intends to use the approved **resource** must notify the **chief executive** by giving a notice in the approved form\(^5\) at least 10 days prior to the commencement of using the **resource**.

**Approved uses**

(7.2) The approved **resource** is **abattoir effluent pond sludge and crust** that complies with **Requirement (6.3)** of this EOW code and is used for the following purposes:

   a) as a **soil conditioner** on **agricultural land**: and/or
   
   b) as a feedstock in the manufacturing of **compost**.

**Resource use as a feedstock in the manufacturing of soil conditioner**

(7.3) Prior to the application of the **resource** to **agricultural land**, an **appropriately qualified person** must determine the agronomic loading rate after considering the **resource** composition, crop nutritional demand and soil characteristics of the **site of use**.

(7.4) The **resource** must only be applied to the **site of use** at the agronomic loading rate determined by an **appropriately qualified person** in accordance with **Condition (7.3)**.

(7.5) The **resource user** must maintain the following **records** for all applications of the **resource** to **agricultural land**:

   a) details of the assessment carried out by the **appropriately qualified person** to determine the agronomic loading rates in accordance with **Condition (7.3)**;
   
   b) details of the **site of use** on which application occurs (e.g. soil pH, farm map block/paddock details and/or GPS coordinates);
   
   c) date of application of the **resource**; and
   
   d) actual application rate (expressed as the quantity (e.g. cubic metres per hectare per application)) for each application.

(7.6) The **resource** must not be used within 100m of **surface waters** or 500m of residential dwellings (excluding dwellings on the property where the resource is to be applied where the occupants consent has been obtained).

---

\(^5\) The approved form, **Notification of use of a resource** is available on the Queensland Government website at [www.qld.gov.au](http://www.qld.gov.au), using the publication number (ESR/2018/4552) as a search term.
Resource use as feedstock in the manufacturing of compost

(7.7) The resource must only be used to manufacture compost that meets the requirements of AS 4454.

Storage of the resource

(7.8) Any storage of the resource on the site of use must not exceed the operational demand for the purpose of the use(s) approved under this EOW code.

(7.9) The resource must be stored in a way that prevents contact with stormwater or runoff.

Records

(7.10) The resource user must record the following information for each load of the resource received by the resource user under this EOW code:

a) business or individual's name, ABN and address of the registered resource producer who supplied the resource;

b) date the resource user received the resource;

c) quantity (in tonnes) of the resource received by the resource user; and

d) site of use of resource (e.g. street address, lot on plan and/or GPS coordinates).

(7.11) All records required to be kept by the resource user under the conditions of this EOW code must be:

a) kept by the resource user for a period of not less than five (5) years; and

b) provided to the chief executive upon request and in the format requested and time period specified.

Notification of emergencies, incidents and breaches

(7.12) Any breach of a condition of this EOW code must be reported to the chief executive as soon as practicable and within 24 hours of becoming aware of the breach.

(7.13) Records of any breach of a condition of this EOW code, including full details of the breach and any subsequent actions taken, must be kept and provided to the chief executive upon request and in the format requested and time period specified.

8. Definitions

Words and phrases used throughout this EOW code in bold are defined below. Where a definition for a term used in this EOW code is sought and the term is not defined within this EOW code the definitions provided in the relevant legislation shall be used.

‘abattoir facility’ means a facility approved under the Environmental Protection Act 1994 to conduct environmentally relevant activity 25 Meat processing.

‘abattoir effluent pond sludge and crust’ means the sludge and crust generated by aerobic and anaerobic effluent ponds at an abattoir facility.

‘ABN’ means Australian Business Number which is a unique 11 digit number issued by the Australian Business Register and identifies a business in Australia.
‘agricultural land’ means land used for agricultural crops which includes horticulture, turf and land growing field crops or pastures.

‘appropriately qualified person’ means a person who has professional qualifications, training, skills or experience relevant to the nominated subject matter and can give authoritative assessment, advice and analysis on performance relating to the subject matter using the relevant protocols, standards, methods or literature.

‘AS 4454’ means Australian Standard 4454 Composts, soil conditioners and mulches (2012), or its most recent version.

‘business’ means a body of persons, whether incorporated or unincorporated.

‘chief executive’ means the Department of Environment and Science or its successor.

‘compost’ has the meaning in AS 4454 and is an organic product that has undergone controlled aerobic and thermophilic biological transformation through the composting process to achieve pasteurisation and reduce phytotoxic compounds, and achieved a specified level of maturity as specified in Appendix N (Determination of Maturity Index) of AS 4454.

‘composted’ means an organic product that has undergone composting.

‘composting’ means the process by which organic materials are microbiologically transformed under controlled aerobic conditions to achieve pasteurisation and a specified level of maturity as specified in Appendix N (Determination of Maturity Index) of AS 4454.

‘emergency(ies)’ means a situation where either human health or safety is threatened, or serious or material environmental harm has been or is likely to be caused; and urgent action is necessary to protect the health or safety of persons, or prevent or minimise the harm, or rehabilitate or restore the environment because of the harm.

‘environmental harm’ means environmental harm as defined in Chapter 1 of the Environmental Protection Act 1994.

‘lawful(ly)’ means allowed or permitted by law and not contrary to law.

‘load’ means the volume of resource put in or on something for conveyance or transportation, carried at one time. A truck and trailer carrying the resource is considered as one load as well as multiple bins travelling by rail. Where the resource is transported via conveyor systems, information should be recorded on a daily basis until the transfer ceases.

‘measures’ have the broadest interpretation and includes plant, equipment, physical objects, monitoring, procedures, actions, directions and competency.

‘pasteurised’ means an organic product that has undergone pasteurisation.

‘pasteurisation’ means the process whereby the paunch is thermically treated to significantly reduce the numbers of plant and animal pathogens and plant propagules. It must undergo appropriate turning of outer material to the inside of the windrow so that the whole mass is subjected to a minimum of 5 turns with the internal temperature maintained at 55°C or higher for 15 days or longer.

‘plant propagule’ means a plant or part of a plant that could generate a new plant, e.g. a seed, part of a rhizome, corm, bulb or any other fragment from which a plant could grow.

‘person’ means an individual or a corporation.

‘records’ include breach notifications, written procedures, analysis results, monitoring reports and monitoring programs required under a condition or requirement of this EOW code.

‘registered resource producer(s)’ means a person who produces the resource and has registered with the chief executive (in accordance with Requirement (6.1)) to use, sell or give away the resource to be used under this EOW code.
‘resource’ means abattoir effluent pond sludge and crust that meets the criteria and quality characteristics in Requirement (6.3) of this EOW code.

‘resource user(s)’ means a person who has notified the chief executive (in accordance with (Condition (7.1)) to receive the resource from a registered resource producer and uses the resource for a use approved under this EOW code and does so in such a manner which does not cause any environmental harm.

‘site of use’ means the relevant location(s) where the resource user uses the resource in accordance with this EOW code.

‘soil conditioner’ means any composted or pasteurised organic product, that is suitable for adding to soil to improve the growing conditions for plant roots by providing nutritional requirements. A soil conditioner must not have more than 20% by mass of particles with a maximum size above 16mm.

‘surface waters’ means visible bodies of water on the earth’s surface, including rivers, streams, lakes, creeks, dams, reservoirs, ponds, swamps and wetlands, and includes the bed and banks of these bodies of water.

‘waters’ includes river, stream, lake, lagoon, pond, swamp, wetland, surface water, artificial watercourse, bed and bank of any watercourse, dams, non-tidal or tidal waters (including the sea), stormwater channel, stormwater drain, roadside gutter, stormwater run-off, and groundwater and any part-thereof.

- END -
Appendix A — General obligation for all persons

This appendix is not intended to provide a comprehensive assessment of all obligations under Queensland law. It provides some general information and persons are encouraged to familiarise themselves with all requirements related to their specific operation.

Responsibilities under the Environmental Protection Act 1994

All persons within the State of Queensland must also meet their obligations under the Environmental Protection Act 1994, and the regulations made under that Act.

General environmental duty

Section 319 of the Environmental Protection Act 1994 states that we all have a general environmental duty. This means that we are all responsible for the actions we take that affect the environment. We must not carry out any activity that causes or is likely to cause environmental harm unless we take all reasonable and practicable measures to prevent or minimise the harm. To decide what meets your general environmental duty, you need to consider:

- the nature of the harm or potential harm
- the sensitivity of the receiving environment
- the current state of technical knowledge for the activity
- the likelihood of successful application of the different measures to prevent or minimise environmental harm that might be taken
- the financial implications of the different measures as they would relate to the type of activity.

It is not an offence not to comply with the general environmental duty. However, maintaining your general environmental duty is a defence against the following acts:

(a) an act that causes serious or material environmental harm or an environmental nuisance
(b) an act that contravenes a noise standard
(c) a deposit of a contaminant, or release of stormwater run-off, mentioned in section 440ZG.

Some relevant offences under the Environmental Protection Act 1994

Causing serious or material environmental harm (sections 437–39)

Material environmental harm is when the harm is not trivial or negligible in nature. Serious environmental harm is harm that is irreversible, of a high impact or widespread, or that is caused to an area of high conservation value or special significance. Damages, or costs required to rehabilitate the environment, of over $5000 constitutes material environmental harm and damages, or costs required to rehabilitate the environment, of over $50,000 constitutes serious environmental harm.

Serious or material environmental harm excludes environmental nuisance.

Causing environmental nuisance (section 440)

Environmental nuisance is unreasonable interference with an environmental value caused by aerosols, fumes, light, noise, odour, particles or smoke. It may also include an unhealthy, offensive or unsightly condition because of contamination.
Depositing a prescribed water contaminant in waters (section 440ZG)

Prescribed contaminants include a wide variety of contaminants listed in Schedule 10 of the Environmental Protection Regulation 2019.

It is your responsibility to ensure that prescribed contaminants are not left in a place where they may or do enter a waterway, the ocean or a stormwater drain. This includes making sure that stormwater falling on or running across your site does not leave the site contaminated. Where stormwater contamination occurs you must ensure that it is treated to remove contaminants. You should also consider where and how you store material used in your processes onsite to reduce the chance of water contamination.

Placing a contaminant where environmental harm or nuisance may be caused (section 443)

A person must not cause or allow a contaminant to be placed in a position where it could reasonably be expected to cause serious or material environmental harm or environmental nuisance.

Some relevant offences under the Waste Reduction and Recycling Act 2011

Littering (section 103)

Litter is any domestic or commercial waste and any material a person might reasonably believe is refuse, debris or rubbish. Litter can be almost any material that is disposed of incorrectly. Litter includes cigarette butts and drink bottles dropped on the ground, fast food wrappers thrown out of the car window, poorly secured material from a trailer. However, litter does not include any gas, dust, smoke or material emitted or produced during, or because of, the normal operations of a building, manufacturing, mining or primary industry.

Illegal dumping of waste (section 104)

Illegal dumping is the dumping of large volumes of litter (200 litres or more) at a place.

Failure to comply with EOW code (section 158)

A registered resource producer for an EOW code must not use, sell or give away the resource unless the registered resource producer complies with the requirements of the EOW code relating to the resource.

A person, other than a registered resource producer, must not use a resource in a way, or for a purpose, that does not comply with an EOW code for the resource.

Approved: 6 February 2020
