

Application reference: APP0059761

Applicant: Brendan Hardy

ROS: RSO004072

Application type: variation environmental authority

Application Summary

Application Reference: APP0059761

Authority Type: Environmental Authority

Application Type: Variation

Permit Type: Resource Activity

Current timeframe: Track Information Request

Expected end date: 29/09/2020

Industry Sector: Minerals

Lodgement Date: 09/09/2020

Stage: Assessment

Status: Under Assessment

Activity Condition

| Activity | Eligibility Criteria | Complied | Standard Conditions | Complied |
|-------------------------------------------------|----------------------|----------|---------------------|----------|
| Non-Scheduled Mining Activity Mining Lease - ML | | Yes | | No |

Varied Conditions Information

| Varied Condition | Justification |
|--------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mining activities - A13 (2) within 1km of any ground truthed Category B environmentally sensitive area | The requested variation is required to reduce the buffer zone for the Category B environmentally sensitive area. Because of the nature of the road and the topography of the area, water runs back and away from the ESA into the lease area. Mining activities will have negligible environmental risk on the ESA as all water runs away from the ESA. The distance from the boundary of ML 100262 to the ERE boundary is 0.5 metres. |

▼ Environmental Impact Statement - State Development and Public Works Organisation Act 1971

Are there Coordinator General's conditions that relate to the activities being applied for?

No

Has an environmental impact statement (EIS) process under the State Development and Public Works Organisation Act 1971 been completed?

No

▼ Contaminated Land

Is there a site management plan in effect for contaminated land that relates to the land that is the subject of this application?

No

▼ Waste Management

Details of proposed measures for minimising and managing waste generated by the activities

Details of proposed measures for minimising and managing waste generated by the activities

| | |
|-------------|------------------------------------------------------------------------------------------------------------|
| Description | The Potluck Project ML 100262 will have a Waste Management Plan developed and implemented for the Project. |
|-------------|------------------------------------------------------------------------------------------------------------|

Describe the proposed measures for minimising and managing waste generated by the activity/ies below (or on an uploaded document).

I will provide details

▼ Assessment of Environmental Impact

Provide an assessment of the likely impact of each relevant activity on environmental values (EVs). Note: All fields are mandatory, therefore a statement is required where there are no likely impacts to an EV.

| | |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Groundwater | The applicant can comply with all other standard conditions of the environmental code including those that relate to water protection issues. |
| Wetlands | The applicant can comply with all other standard conditions of the environmental code including those that relate to water protection issues. |
| Land | The EA will not have an adverse impact on Land Disturbance within the proposed area. The applicant will comply with condition A2 of the Eligibility criteria and standard conditions for exploration and mineral development projects – Version 2 to ensure compliance with minimising disturbance to land and vegetation and to ensure not more than 1000m2 is disturbed at any one location. |
| Land Use | The applicant can comply with all standard conditions of the environmental code including those that relate to land and vegetation protection issues. |
| Air | The EA will not have an adverse effect on air quality. |
| Acoustic | The applicant can comply with all other standard conditions of the environmental code including those that relate to noise management. |
| Water | The applicant can comply with all other standard conditions of the environmental code including those that relate to water protection issues. |
| Waste | The EA not have an adverse impact on Waste Management Practices. The proposed activities will produce minor quantities of domestic waste, which will be removed from site and disposed of at an approved municipal facility. |

Do you want to upload a separate document or is this part of a combined supporting document?

Combined Supporting Document

▼ Environmental Impact Statement Triggers

The information provided here will assist in determining whether an environmental impact statement (EIS) is required. If your response to any question is yes, you must attach details of how the criterion is triggered including details of the impact. For further information refer to the guideline Triggers for environmental impact statements under the Environmental Protection Act 1994 for mining, petroleum and gas activities.

Is the ERA project for:

Mining activities

Is the ERA project for a mining activity which involves the removal of two million tonnes/year or more of run-of-mine (ROM) ore or coal?

No

Is the ERA project for a mining activity that involves the removal of one million tonnes per year or more of run-of-mine (ROM) ore or coal on or under a floodplain or a coastal hazard area?

No

Is the ERA project for a mining activity which involves the introduction of a novel or unproven resource extraction process, technology or activity?

No

Do you want to upload details as a separate document or is this part of a combined supporting document?

Combined Supporting Document

▼ Environmental Impact Statement - Environmental Protection Act 1994

Has an environmental impact statement (EIS) process under Chapter 3 of the EP Act been completed for all the proposed ERAs that are the subject of this application?

No

▼ Matters of National Environmental Significance

Would the carrying out of the proposed ERA, or where relevant, the ERA project, be likely to have a significant impact on any of the following matters of national environmental significance?

No

▼ Environmental Offsets

Will the environmentally relevant activities being applied for result in a significant residual impact to a matter of State environmental significance (MSES)?

No

▼ Regional Interests Development Approval-1

Is the resource activity located anywhere within an area of regional interest?

No
