Environmental Protection Act 1994

Standard application for a new environmental authority for a resource activity

This is the approved form that is to be used to make a standard application for an environmental authority under sections 122 and 125 of the Environmental Protection Act 1994 (EP Act) for an environmentally relevant activity (ERA) which is a resource activity.

It is recommended that applicants read the information on what to provide with an application, prior to making an application. This information, along with the ERA standard (consisting of eligibility criteria and standard conditions), is located on the Queensland Government's Business Queensland website at www.business.qld.gov.au (use the search term "Environmental Licence"). This website also has a diagnostic tool called the "Forms and fees finder" which will take you through a series of questions and provide a customised result, which will identify any forms, fees and supporting information you need for your application.

Only use this application form if you are applying for a new environmental authority (EA) where:

- All applicants must be registered as a suitable operator. A suitable operator is a person or a corporation assessed under section 318I of the EP Act as being suitable to carry out an ERA and is listed on the suitable operator register¹.
- The ERA/s being applied for is a resource ERA, that involves: (a) a geothermal activity, (b) a greenhouse gas (GHG) storage activity, (c) a mining activity or (d) a petroleum activity. Note that a resource activity is taken to include ancillary activities (prescribed ERAs) and other activities carried out under the authority as a resource activity.
- All of the ERA/s being applied for have eligibility criteria and standard conditions available.
- You can meet all of the eligibility criteria and standard conditions for all of the ERA/s being applied for.
- An application for a relevant resource tenure has been made, or will be made at the same time as this application.
- The applicant/s for the resource tenure are exactly the same as the applicant/s for this environmental authority application.
- The ERA/s being applied for do not form part of an ERA project under an existing environmental authority.
- If your application relates to a coordinated project under the *State Development and Public Works Organisation Act 1971*, the Coordinator-General's conditions outlined in the Coordinator-General's evaluation report **must not**:
 - alter the standard conditions for the ERA/s being applied for; or
 - require additional conditions to be imposed on the environmental authority.

¹ The register is available on the Queensland Government website at www.qld.gov.au, using the search term "suitable operator register".

Standard application for an environmental authority for a resource activity

- If more than one ERA is being applied for, the activities must be carried out as part of a single integrated operation:
- the ERAs being applied for will be carried out under the day to day management of a single responsible person (e.g. a site manager or operations manager); and
 - all of the ERAs are operationally interrelated, that is, the operation cannot function without all of the ERAs. Separate applications will need to be made for the ERAs that cannot be carried out as a single integrated operation; and
 - the ERA/s are, or will be, carried out at one or more places; and
 - the places where the ERAs will be carried out are close enough to make the integrated day to day management of the activities feasible.

If you would like to have a pre-lodgement meeting, please complete and lodge the form Application for pre-lodgement services (publication number ESR/2015/1664²), prior to lodging this application for an environmental authority.

The fields marked with an asterisk * are mandatory, if they are not completed then your application may be considered not properly made under section 128 of the *Environmental Protection Act 1994*.
