GWQ1193 - Haughton and Don Basins Groundwater
Cainozoic deposits overlying the GAB zones
Part of Basins 119 and 121
Environmental Protection (Water) Policy 2009
Central Queensland Map Series

This plan forms part of the Haughton and Don Basins Environmental Values and Water Quality Objectives scheduling document, prepared pursuant to the Environmental Protection (Water) Policy 2009.

GWQ1193 - Haughton and Don Basins Groundwater
Cainozoic deposits overlying the GAB zones
Part of Basins 119 and 121

Notes:
1. The AWQG recommends that the highest level of protection should be provided to underground aquatic ecosystems, given their high conservation value. Where groundwaters are in good condition the intent is to maintain existing water quality (20th, 50th and 80th percentiles).
