Permit Application Amendment APP0043400 Review and Plan: Westside CSG D Pty Ltd, WestSide CSG A Pty Ltd, Mitsui E&P Australia Pty Limited

Review Application

Permit Application Details

Application Summary

Application Reference: APP0043400
Authority Type: Environmental Authority
Application Type: Amendment
Permit Type: Resource Activity
Current timeframe: ALD Notice Decision
Expected end date: 18/11/2019

Questions and Answers

Is the resource activity located anywhere within an area of regional interest?
Yes

Would the carrying out of the proposed ERA, or where relevant, the ERA project, be likely to have a significant impact on any of the following matters of national environmental significance?
No

What is the ANZSIC code for the activity?
1200 Oil and gas extraction

What is the website address for the application notice and application documents?
Website address: https://www.westsidecorporation.com/

Does the application relate to an environmental authority for a coal seam gas activity that is an ineligible ERA?
No

Will the ERA(s) being applied for cause, or be likely to cause, a significant residual impact to a prescribed environmental matter (other than a matter of local environmental significance)?
No

Has an environmental impact statement (EIS) process that includes the proposed amendment been completed?
No

Is the proposed ERA amendment for an increase in the annual extraction of more than 100 percent or 5 million tonnes per year (whichever is the lesser)?
No

Provide details of the proposed measures for minimising and managing waste generated by any amendments to the relevant activity.
Waste are to be managed in accordance with the current PL 94 conditions and section 7.10 of the supporting information.

Is any part of the land currently recorded in, or has previously been recorded in, the environmental management register?
No

Do you currently have a financial assurance or estimated rehabilitation cost decision as part of the approved environmental authority?
Yes

Is this land currently subject to an environmental protection order or a site management plan?
No

Do you have an environmental protection order or site management plan?
Not Applicable

For which regional interest area do you have, or will you be required to have, a regional interests development approval?
No regional interests development approval required; I am an exempt activity.

Is there a site management plan in effect for contaminated land that relates to the land that is the subject of this application?
No

Describe the proposed amendment

<table>
<thead>
<tr>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Proposed amendment is to increase the activity in PL 94. The amendment is based on the full development scenario, which is for 600 wellheads and the supporting infrastructure. This will be a 10% increase in disturbance, therefore it is a major amendment.</td>
</tr>
</tbody>
</table>

Describe the land that will be affected by the proposed amendment.

<table>
<thead>
<tr>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>The activities will be undertaken on PL 94</td>
</tr>
</tbody>
</table>

State whether each relevant activity will, if the amendment is made, comply with any eligibility criteria for the activity. Include a declaration that the statement is correct.

<table>
<thead>
<tr>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>WestSide will comply with any eligibility criteria for the activity</td>
</tr>
</tbody>
</table>

If the activity/activities are proposed to be undertaken on a mineral development license (MDL), mining lease (ML) or petroleum lease (PL), does the application propose to exercise underground water rights?

If you select Yes, you must attach documentation detailing:
- the areas in which underground water rights are proposed to be exercised;
- for each aquifer affected, or likely to be affected, by the exercise of underground water rights:
  (i) a description of the aquifer;
  (ii) an analysis of the movement of underground water to and from the aquifer, including how the aquifer interacts with other aquifers and surface water; and
  (iii) a description of the area of the aquifer where the water level is predicted to decline because of the exercise of underground water right; and
- (iv) the predicted quantities of water to be taken or interfered with because of the exercise of underground water rights during the period in which resource activities are carried out;
- the environment values that will, or may, be affected by the exercise of underground water rights and the nature and extent of the impacts on the environmental values;
- any impacts on the quality of groundwater that will, or may, happen because of the exercise of underground water rights during or after the period in which resource activities are carried out; and
- strategies for avoiding, mitigating or managing the predicted impacts on the environment values or the impacts on the quality of groundwater.

Yes

Do you want to upload a separate document or is this part of a combined supporting document?
Combined Supporting Document

Do you need to change the financial assurance or estimated rehabilitation cost decision in relation to this amendment?
I will be changing the estimated rehabilitation cost and will submit an Application for an Estimated Rehabilitation Cost decision

Provide an assessment of the likely impact of each relevant activity on environmental values (EVs). Note: All fields are mandatory, therefore a statement is required where there are no likely impacts to an EV.

<table>
<thead>
<tr>
<th>Activity</th>
<th>Impact to EV</th>
</tr>

Is the proposed ERA amendment for an increase in annual extraction of more than 10 percent or 10 million tonnes per year (whichever is the lesser)?
No

Do you want to upload a separate document or is this part of a combined supporting document?
Combined Supporting Document

Is the proposed ERA amendment for an increase in annual extraction of greater than 25 percent?
No

Is the proposed ERA amendment for a mining activity that will extend into a category A or B environmentally sensitive area (ESA), unless previously authorised by the state?
No

Is the proposed ERA amendment for a mining activity that would involve a substantial change in mining operations? For example; from underground to open cut, or (for underground mining) a change in operations that currently causes little subsidence but with the proposed ERA amendment, is likely to cause substantial subsidence?
No

Is the proposed ERA amendment for a mining activity and a novel or unproven resource extraction process, technology or activity?
No
Is the proposed ERA amendment for a petroleum and gas activity that is likely to have a total disturbance area of greater than 2000 hectares at any one time during the life of the proposed project? This includes areas occupied by well pads (single or multi-directional), access tracks and roads, water storages, and process plants.

No

Is the proposed ERA amendment for a petroleum and gas activity that is likely to involve the construction of a high pressure pipeline over a distance of 300 kilometres or greater?

No

Is the proposed ERA amendment for a petroleum and gas activity that is likely to involve the construction of a liquefied natural gas plant?

No

Do you want to upload a separate document or is this part of a combined supporting document?
