Re: Proposed action to amend end of waste code ENEW07359617

This Notice is issued to advise you that the department is proposing to amend the End of Waste Code ENEW07359617 for the use of biosolids as a resource.

The reasons for the proposed action and the facts and circumstances that form the basis for the reasons are provided below.

A draft EOW code for the use of biosolids as a resource was publicly consulted during 29 October 2018 - 29 November 2018 for which a significant number of concerns were received in relation to some of the requirements and conditions in the code.

This created a need to further review the provisions in the draft EOW code and consult with relevant stakeholders prior to finalising the EOW code.

Since the General Beneficial Use Approval (BUA) for biosolids ENBU06949016 was expiring on 31 December 2018, as an interim arrangement to allow for the continuous use of biosolids, an EOW code was developed based on the provisions of the General BUA.

An amendment of the current EOW code is proposed to fulfill the commitment made to the industry that the 'interim' EOW code would be amended to reflect the outcomes of the submissions received on the draft EOW code that was publicly consulted during the above period.

You may make a written submission to the chief executive about the proposed action by 26 November 2019. Written submissions are to be made to the department by email to RRS.Consultation@des.qld.gov.au.
