GWQ1208 - Burdekin Basin Groundwater Basal GAB Zones

This plan forms part of the Burdekin Basin Environmental Values and Water Quality Objectives scheduling document, prepared pursuant to the Environmental Protection (Water) Policy 2009.

Notes:
1. The AWQG recommends that the highest level of protection should be provided to underground aquatic ecosystems, given their high conservation value. Where groundwaters are in good condition the intent is to maintain existing water quality (20th, 50th and 80th percentiles).
