Application form
Environmental authority

Application to amend an environmental authority

This approved form is to be used when applying to amend an environmental authority under sections 222 to 227 of the Environmental Protection Act 1994 (EP Act) for an environmentally relevant activity (ERA).

An application to amend an environmental authority is not appropriate in all circumstances. If you answer YES to any of the questions in the checklist below, you cannot use this application form. If you answer NO to all of the questions in the checklist, you may continue to use this application form.

This form also contains a question relating to the Regional Planning Interests Act 2014. If you are proposing to undertake resource activities in an area of regional interests, a regional interest development approval (RIDA) may be needed. Further information, including applications forms, can be found on the Department of Infrastructure, Local Government and Planning (DILGP) website, www.dilgp.qld.gov.au.

You are encouraged to have a pre-lodgement meeting before applying to amend your environmental authority. If you would like to have a pre-lodgement meeting:

- for prescribed ERAs 2, 3 and 4—contact the Department of Agriculture and Fisheries by email at livestockregulator@daf.qld.gov.au.
- for any other ERA—please fill out and lodge the form “Application for a pre-design/pre-lodgement meeting” (EM11251), prior to lodging this application form.

Checklist for making an amendment application

You must complete this checklist before you continue with the application form.

If your application is for:

- a prescribed ERA → fill in Section 1 and Section 2 of the checklist below
- a resource activity → fill in Section 1 and Section 3 of the checklist below
- both a prescribed ERA and a resource activity → fill in sections 1, 2 and 3 of the checklist below

If you have answered yes to any of the below questions, you cannot use this application form. If you have answered no to all of the below questions, you may continue to use this application form.

(c) does not change any rehabilitation objectives stated in the authority in a way likely to result in significantly different impacts on environmental values than the impacts previously permitted under the authority; and

(d) does not significantly increase the scale or intensity of the relevant activity; and

(e) does not relate to a new relevant resource tenure for the authority that is—

   (i) a new mining lease; or

   (ii) a new petroleum lease; or

   (iii) a new geothermal lease under the Geothermal Energy Act; or

   (iv) a new GHG injection and storage lease under the GHG storage Act; and

   (ii) if the amendment involves extending an existing pipeline—the extension does not exceed 10% of the existing length of the pipeline; and

(h) if the amendment relates to a new relevant resource tenure for the authority that is an exploration permit or GHG permit—the amendment application under section 224 seeks an amended environmental authority that is subject to the standard conditions for the relevant activity or authority, to the extent it relates to the permit.

Mobile and temporary ERA

A prescribed ERA, other than an activity that is dredging material, extracting rock or other material, or the incinerating of waste:

(a) carried out at various locations using transportable plant or equipment, including a vehicle

(b) that does not result in the building of any permanent structures or any physical change of the landform at the locations (other than minor alterations solely necessary for access and setup including, for example, access ways, footings and temporary storage areas)

(c) carried out at any 1 of the locations:

   (i) for less than 28 days in a calendar year, or

   (ii) for 28 or more days in a calendar year only if the activity is necessarily associated with, and is exclusively used in, the construction or demolition phase of a project.

Prescribed ERA

An environmentally relevant activity that is not a resource activity and is prescribed under section 19 of the EP Act.
Prescribed ERA project  All prescribed ERAs carried out, or proposed to be carried out, as a single integrated operation.

Registered suitable operator A person who, or a corporation which, under section 318I of the EP Act has been assessed as being suitable to carry out an ERA and has been listed on the suitable operator register.

Resource activity An activity that is any of the following:

(a) a geothermal activity
(b) a greenhouse gas (GHG) storage activity
(c) a mining activity
(d) a petroleum activity.

Resource project Resource activities carried out, or proposed to be carried out, under 1 or more resource tenures, in any combination, as a single integrated operation.

Single integrated operation Occurs when all the below criteria are met:

(a) the activities are carried out under the day-to-day management of a single responsible individual, for example, a site or operations manager
(b) the activities are operationally interrelated
(c) the activities are, or will be, carried out at one or more places
(d) the places where the activities are carried out are separated by distances short enough to make feasible the integrated day-to-day management of the activities.
GUIDE
If you require assistance in answering any part of this form, or have any questions about your application please contact the relevant department. Contact details are at the end of this form.

The environmental authority number and details may be found on the existing environmental authority or quoted in other correspondence received from the administering authority.

If more space is required for any responses, please attach additional information as a separate page.

If there is an agent acting on behalf of the environmental authority holder, provide details in this section. An agent could be a consultant or a contact for the environmental authority holder.

As statutory documents need to be sent to all applicants, this section can also be used when there are multiple environmental authority holders to nominate an address for statutory documentation to be sent ‘care of’ to.

2. **Describe in detail the proposed amendment and the reason the amendment is being sought**

The decision of whether the amendment is major or minor is made by the administering authority. However, the administrative process requires you to indicate whether you think the proposed amendment will constitute a major or minor amendment. If you have questions regarding whether your amendment will be minor or major you are encouraged to arrange a pre-lodgement meeting with the administering authority.

Please indicate below whether you think the proposed amendment will constitute a major or minor amendment.

- **□** Minor amendment – select minor amendment type
  - **□** Minor amendment (condition conversion) – you wish to convert all conditions of your EA to the standard conditions for the ERAs to which the EA relates

  Go to question 21.

  By selecting this amendment type you are certifying that you have a complete and thorough understanding of, and can comply with the ERA Standard (eligibility criteria and standard conditions).

  **□** Minor amendment (threshold) – Please complete the detailed description below

- **☑** Major amendment – please complete the detailed description below

  For a **minor amendment (threshold)** or **major amendment**, provide a detailed description of your proposed amendment.

  Include a justification of how your proposed amendment meets the criteria for a major or minor amendment and attach any supporting information to this application.

  If the amendment is to add or delete a location, tenure or activity, or to change the threshold of an activity, provide details.
**Background information**

PROVIDE DETAILS OF THE CIRCUMSTANCES GIVING RISE TO THE PROPOSED AMENDMENT (IF INSUFFICIENT ROOM, ATTACH A SEPARATE DOCUMENT).

New mining lease application in the same region as those covered by the existing EA. To be worked as one project.

**DETAILS INCLUDING THE RELEVANT ELIGIBILITY CRITERIA, ERA NUMBER AND THRESHOLD, AND FACTORS AFFECTING COMPLIANCE.**
5. What is the ERA type you are applying to amend?

☐ Prescribed ERA—this application involves only prescribed ERA activities → go to question 6

☒ Resource activity—this application involves resource activities → go to question 11

Prescribed ERA information

This question is only relevant to prescribed ERAs as resource activities will not trigger assessable development under the Sustainable Planning Act 2009.

6. Are there any development permits in effect or have any development applications been made under the Sustainable Planning Act 2009 to carry out the proposed amendment?

☐ No → go to question 7

☐ Yes → provide a list of applicable development permits or applications below

If you have identified above that any of the ERAs have not commenced, please complete the below:

☐ I declare that where identified, the ERAs above have not commenced.
The final rehabilitation report must be completed in the correct template and contain all the information specified in the template. The final rehabilitation report template is available at www.qld.gov.au using the publication number (EM872) as a search term.

Only a person with appropriate environmental expertise and/or experience in planning and executing site operations should sign this statement. This person may be the environmental authority holder, a full time employee of the environmental authority holder or a consultant to the environmental authority holder.

Methods to verify compliance may include a desktop assessment of documentation, an interview with the landowner/holder or a field operator or a site inspection. Evidence used may include photographs, statements and other documentation (maps, plans, approvals, monitoring results etc.).

8. Does your environmental authority contain any rehabilitation conditions that are applicable to the ERAs that you are requesting be removed from the environmental authority?

☐ Yes → you must attach a final rehabilitation report
☐ No

9. Compliance with conditions

A statement addressing compliance with environmental authority conditions must be completed by, or on behalf of the environmental authority holder.

Attach a separate document to this application form which states the extent to which:

- the ERAs being removed from the environmental authority have complied with each relevant condition of approval
- the final rehabilitation report is accurate (include the date of the final rehabilitation report). Note: The compliance statement only needs to be made for the final rehabilitation report if the answer to question 8 is ‘Yes’

Describe the qualifications and experience of the person signing the statement.
Provide details of the date, method and evidence used to verify compliance and accuracy.

Provide the contact number of the person signing the statement

I .................................................................................................................................

(insert name and position of person making the compliance statement)

- make the statement by or for the holder of the environmental authority
- confirm that, to the best of my knowledge, all information provided as part of this statement, including attachments, is true, correct and complete. I am aware that it is an offence under section 480 of the Environmental Protection Act 1994, to give the administering authority information that I know is false, misleading or incomplete
- confirm that, to the best of my knowledge, this statement, including attachments, does not include false, misleading or incomplete information
- confirm that, to the best of my knowledge, I have not knowingly failed to reveal any relevant information or document to the administering authority
- confirm that, to the best of my knowledge, all information provided in this statement, including attachments, address the relevant matters and are factually correct
- confirm that the opinions expressed in this statement, including attachments, are honestly and reasonably held
- I understand that all information supplied as part of this statement, including attachments, can be disclosed publicly in accordance with the Right to Information Act 2009 and the Evidence Act 1977.

SIGNATURE .................................. DATE ..................................

If your amendment application also involves resource activities, go to question 10. Otherwise, go to question 16.
Resource activity information

A regional interests development approval (RIDA) is required when a resource activity is proposed in an area of regional interest under the Regional Planning Interests Act 2014. Further information, including applications forms, can be found on the Department of Infrastructure, Local Government and Planning (DILGP) website, www.dilgp.qld.gov.au.

Offset delivery can be staged, however for this to occur, the condition of any approved environmental authority needs to state that both the activity and the offset may be staged. As part of your notice of election for each stage under the Environmental Offsets Act 2014 you are required to provide a detailed assessment of the quantum of impact of that stage and the offset obligation requirement to be delivered for that stage.

10. Is the resource activity located anywhere within an area of regional interest?

☐ No

☐ Yes, which regional interest area, have or will you require a regional interests development approval?

☐ Priority Agricultural Areas (PAAs) application reference:

☐ Priority Living Areas (PLAs) application reference:

☐ Strategic Environmental Areas (SEAs) application reference:

☐ Strategic Cropping Area (SCA, formerly Strategic Cropping Land) application reference:

☐ No regional interests development approval required, I am an exempt activity.

11. Environmental offsets

An environmental offset may be required for an ERA where despite all reasonable measures to avoid and minimise impacts on certain environmental matters, there is still likely to be a significant residual impact on one or more of those matters.

You must verify the presence, whether temporary or permanent, of those environmental matters. For more information refer to the State Significant Impact Guideline at the Queensland Government website at: www.qld.gov.au/environment/pollution/management/offsets/index.html

Will the proposed amendment cause a significant residual impact to a prescribed environmental matter (other than a matter of local environmental significance)?

☒ No

☐ Yes, please attach supporting information that:

• details the magnitude and duration of the likely significant residual impact on each prescribed environmental matter (other than matters of local environmental significance) for the entire activity; and
• demonstrates that all reasonable measures to avoid and minimise impacts on each of those matters will be undertaken; and
• if the activity is to be staged, details of how the activity is proposed to be staged

☐ I have attached the supporting information.
This question applies if the current activity is a resource activity or the application is to add a resource activity to an existing operation.

Both the administering authority and the applicant have responsibilities to make the application notice and application documents available on a website during the public notification period. If the applicant has a website the administering authority will link to the location where the applicant will store these documents. A word searchable electronic PDF copy of the application documents must also be included.

‘Resource activities’ include mining, geothermal, greenhouse gas storage, petroleum or coal seam gas activities.

The administering authority will only link to the applicant’s site or post the application documents if it is determined that the amendment represents a ‘major amendment’ and that public notification is required.

12. Public notice requirements. Please select one of the options below:

- The application relates to a mining activity only and public notice requirements will not apply
- I have included details of the website where copies of the application notice and application documents will be made available during public notification stage. If the administering authority will require permission to link to this website, also provide contact details of the person who will be able to assist the administering authority in this process.
- I cannot make this information available on a website. All of the application information has been provided to the administering authority in an electronic format.

13. Does the application relate to an environmental authority for a coal seam gas activity that is an ineligible ERA?

- No → go to question 14
- Yes →
  - I have determined that the amendment will not change the way that CSG water is managed.
  - I have determined that the amendment will change the way that CSG water is managed and have provided the mandatory information set out below.

</tr>
</tbody>
</table>
The measurable criteria ('management criteria') against which the applicant will monitor and assess the effectiveness of the management of the water, including, for example, criteria for each of the following:

(i) the quantity and quality of the water used, treated, stored or disposed of
(ii) protection of the environmental values affected by each relevant CSG activity
(iii) the disposal of waste, including, for example, salt, generated for the management of the water.

The action proposed to be taken if any of the management criteria are not complied with, to ensure that the criteria will be able to be complied with in the future.

If the application includes a CSG evaporation dam, an evaluation of the following must be provided:

(i) best practice environmental management for managing CSG water
(ii) alternative ways for managing CSG water
(iii) whether there is a feasible alternative to a CSG evaporation dam for managing the water. Note if the evaluation shows that there is a feasible alternative option, the CSG evaporation dam cannot form part of the water management for this amendment application.

General ERA information

Completion of an EIS process is defined in section 60 of the EP Act.

14. Has an environmental impact statement (EIS) process that includes the proposed amendment, been completed?

☒ No

☐ Yes → ☐ I have assessed the environmental risks of the proposed amendment and consider them to be the same as was assessed in the EIS. A copy of the assessment is attached. Go to question 17

☐ I have assessed the environmental risks of the proposed amendment and consider them to be different to what was assessed in the EIS. Go to question 15
The information provided here will assist the administering authority in deciding whether an EIS is required.

For further information refer to the guideline: Triggers for Environmental Impact Statements under the Environmental Protection Act 1994 for mining, petroleum and gas activities. This guideline is available at www.qld.gov.au, using the search term ‘triggers for environmental impact statements’.

16. Assessment of the environmental impact and provision of specific supporting information

You must provide an assessment of the likely impact of the proposed amendment on the environmental values, including the following mandatory information in the table below, unless the not applicable check box is ticked.

Only tick the ‘Not Applicable’ check box if the proposed amendment does not cause a change to the environmental values, aspects and impacts as approved under the current environmental authority.

Where the ‘Not Applicable’ option is selected, sufficient information must be provided to support this determination, as the determination forms part of the required assessment.

22. Declaration

Note: If you have not told the truth in this application you may be prosecuted.

Where an agreement is in place between all holders of the environmental authority, that 1 holder can sign on behalf of the other joint holders, please tick the below checkbox.

☒ I have the authority to sign this form on behalf of all the joint holders of the environmental authority.

I declare that:

- I am the holder of the environmental authority, or authorised signatory for the holder of the environmental authority.
- If the proposed amendment is made, the relevant activities will continue to comply with the ERA Standard (eligibility criteria and standard conditions) for all eligible ERAs, or where they cannot, I have indicated otherwise in my application and provided the required support information.
- If the proposed amendment is a minor amendment (condition conversion) that I can comply with the ERA Standard (eligibility criteria and standard conditions) for each of the ERAs authorised by the environmental authority.
- The information provided is true and correct to the best of my knowledge. I understand that it is an offence under section 480 of the Environmental Protection Act 1994 to give to the administering authority or an authorised person a document containing information that I know is false, misleading or incomplete in a material particular.
- I understand that I am responsible for managing the environmental impacts of these activities, and that approval of this application is not an endorsement by the administering authority of the effectiveness of management practices proposed or implemented.

Dear Sir or Madam,

An application for the above permit has been lodged in MMOL and the prescribed fees have been received by this Department.

The following documents are attached for your assessment –

- MMOL Permit Application form
- Amendment of EA form
- Receipt for prescribed fees

Please advise of the outcome to allow public notification to proceed. Where a code compliant EA is granted, advice of the financial assurance required would be appreciated.

Kind Regards,

Laura Coleman

QUESTION 16 –

ENVIRONMENTAL VALUES LIKELY TO BE AFFECTED

The applicant will be operating a mobile plant in the alluvial area of the creek. He will not be disturbing any canopy species trees. The sub-canopy trees are very sparse and the shrub layer varies from none to mid-dense and the general area is considered regional ecosystem of least concern. Therefore, impact to the environmental values will be low to nil, as he intends to work only the areas of sand that are accessible to the plant.

EMMISSIONS OR RELEASES

Plant and machinery being used are run on standard diesel. No emissions or releases apply. All oil, etc used for maintenance will be contained in drums and removed from the area.

RISKS AND LIKELY IMPACT ON ENVIRONMENTAL VALUES

The vegetation is classed as Category B – of least concern.

The area is classed as a watercourse on the vegetation management and watercourse feature and drainage, Queensland globe map.

No canopy or sub-canopy trees will be disturbed. Water in the watercourse will be for non-consumptive use. Settling pond/s will ensure any turbidity will be removed from water before being released back into the watercourse. Therefore, the likely impact on environmental values will be low to very low.

MANAGEMENT PRACTICES PROPOSED TO PREVENT OR MINIMISE ADVERSE IMPACTS

Mid to large vegetation will not be disturbed. Where ever possible, the plant will only work the alluvial deposits. Settling ponds will remove any sediment before being released back into the watercourse.

Any oils, etc will be contained and removed from the area.

The target mineral will be extracted using water separation. No chemical or other addition to the water is required.

As an area is worked, the rocks and sand will be returned to the same area, removing only the target mineral.

REHABILITATION

Rehabilitation will be ongoing, as the mobile plant moves along the watercourse. Rehab will be as per the management practices, described above.

Any structures such as camp and workshop will be removed at the end of the tenure.
MSES Values Present

The MSES values that are present in the area of interest are summarised in the table below:

<td>0.0 ha</td>
<td>0.0%</td>
</tr>
</tbody>
</table>

Please note that the area and percent area figures in the table above will not necessarily add up to the "Total MSES" figures due to overlapping values.

*The total extent area of regulated vegetation (Criteria 4.1) may be overestimated due to the presence of dominant and/or subdominant non-regulated regional ecosystems in mixed patches of vegetation, i.e. the total area of mixed vegetated patches is included irrespective of whether the patch consists only partly of endangered, of concern or wetland regional ecosystems.

**The total linear extent of watercourses may be overestimated in some instances, as both banks (rather than the centreline) of waterbodies and larger watercourses where present are mapped by the State, increasing the extent of linear features.
