

# End of Waste Code Liquid Concrete Washout (ENEW07602719)

Waste Reduction and Recycling Act 2011

### Version history

Version	Date	Description of changes
1.00	6 March 2020	Commencement of EOW code on gazettal
1.01	9 November 2020	Minor amendment to correct clerical error in Requirement 6.3. e) vi and x
1.02	23 June 2023	Minor update to reflect the definition of waste moving into the <i>Waste</i> <i>Reduction and Recycling Act 2011.</i> This does not impact the interests of the producer or user of the resource.
1.03	28 March 2024	Updated department name to reflect machinery of government changes and the definition of serious or material harm.

### 1. Explanatory Statement

This End of Waste (EOW) code for waste **liquid concrete washout** has been issued by the Queensland Government in accordance with section 159 of the *Waste Reduction and Recycling Act 2011* (WRR Act).

This EOW code states when the **liquid concrete washout** becomes a **resource** and any relevant requirements and/or conditions for its use. If the **resource** is not being used in accordance with the relevant requirements and/or conditions of this EOW code, or another type of permit that allows for its use, it is considered a waste under section 8AA of the WRR Act and must be disposed of appropriately at a facility that is lawfully able to receive the waste.

### 2. Guidance

### 2.1 Resource use versus activity

An EOW code states when a waste stops being a waste following any necessary processing or treatment. A waste becomes a **resource** when it has been determined to meet the requirements of an EOW code. It may be necessary to treat or process the waste prior to meeting those requirements. An Environmental Authority (EA) under the *Environmental Protection Act 1994* (EP Act) is required where an activity being undertaken triggers the threshold for any environmentally relevant activity (ERA). This means that treating or processing the waste to meet the resource quality criteria under the EOW code may require an EA under the EP Act if the activity meets the threshold for an ERA.

### 2.2 Resource versus waste

A waste that is a **resource** under an EOW code is considered a **resource** only for the use(s) approved in an EOW code. If a **resource** does not meet the requirements of the EOW code and/or is not used in accordance with the EOW code, it is not deemed a **resource**. It remains a waste and must be managed in accordance with waste management requirements under the EP Act and the WRR Act and their subordinate legislation.

A **resource** approved under an EOW code, is deemed to be a waste again, if it is disposed of at a waste disposal facility, or if it is deposited at a place in a way that would, apart from its use approved under an EOW code, constitute a contravention of the general littering provision or the illegal dumping of waste provision under the WRR Act.

### 2.3 Failure to comply

It is an offence under section 158(1) of the WRR Act for a **registered resource producer** to produce the **resource**, or use, sell or give away the **resource** if they do not comply with the requirements under an EOW code. Further, it is an offence under section 158(2) of the WRR Act for a **person** to use the **resource** in a way, or for a purpose, that does not comply with an EOW code. These offences carry a maximum penalty of 1,665 penalty units for an individual and 8,325 penalty units for a corporation<sup>1</sup>.

Please refer to Appendix A of this EOW code for general obligations for all **persons** operating under this EOW code, which includes the **resource users**.

### 2.4 Lawfulness of the activity

The issuing of this EOW code for the use of a **resource** does not warrant or imply the lawfulness of the activity under all legislation, or that approvals necessary under other legislation have or will be approved. It is the

<sup>&</sup>lt;sup>1</sup> The value of a penalty unit is stated in the *Penalties and Sentences Regulation 2015* (Qld).

responsibility of the **registered resource producer** and **resource user** to identify and obtain all other approvals necessary for the relevant activities.

### 3. Period of this EOW code

This EOW code takes effect from 06 March 2020 and remains in force until it is amended, cancelled or suspended by the **chief executive**<sup>2</sup>.

### 4. Waste to which this EOW code applies

This EOW code is limited to **liquid concrete washout**. The **liquid concrete washout** becomes a **resource** when the requirements and conditions under this EOW code are met.

#### 5. Person to whom this EOW code applies

### 5.1 Registered resource producers of the resource

5.1.1 A **registered resource producer** for this EOW code must comply with the stated registered resource producer requirements in Section 6 – Registered Resource Producer Requirements.

#### 5.2 Resource users

- 5.2.1 The **resource user** must only use the **resource** in a way, and for a purpose allowed under this EOW code.
- 5.2.2 The **resource user** must comply with the stated conditions of use in Section 7 Conditions of Use.

<sup>&</sup>lt;sup>2</sup> If an EOW code is to be amended, cancelled or suspended, the chief executive will provide an opportunity to make written submissions by providing a proposed action notice to the registered resource producers; and publishing the proposed action notice on the department's <u>website</u>.

### 6. Registered Resource Producer Requirements

Regis	stration u	inder this EOW code			
(6.1)	execut	Prior to operating under this EOW code, the producer of the <b>resource</b> must register with the <b>chief executive</b> by giving a notice in the approved form <sup>3</sup> to become a <b>registered resource producer</b> for this EOW code.			
Approv	ved reso	ource			
(6.2)	The ap	The approved resource is liquid concrete washout.			
Inform	nation to I	be provided			
(6.3)	3) The <b>registered resource producer</b> must provide the following to the <b>resource user</b> upon establishment of an arrangement to sell or give away the <b>resource</b> , and annually thereafter				
	a)	a copy of the EOW code for <i>Liquid Concrete Washout (ENEW07602719)</i> 4;			
	b)	the registered resource producer's business name, ABN and address;			
	c)	confirmation in writing that the <b>resource</b> being supplied is compliant with the requirements of this EOW code;			
	d)	safety data sheet for the resource; and			
	e)	for each <b>site of production</b> , a most recent certificate of analysis for the quality of the <b>resource</b> being supplied, including but not limited to, the following quality characteristics:			
		i. pH;			
		ii. electrical conductivity;			
		iii. arsenic;			
		iv. cadmium;			
		v. chromium (total);			
		vi. chromium (VI);			
		vii. cobalt;			
		viii. copper;			
		ix. lead;			
		x. mercury;			
		xi. nickel;			
		xii. selenium; and			
		xiii. zinc.			

### Resource monitoring

<sup>&</sup>lt;sup>3</sup> The approved form, *Registered Resource Producer for an EOW code,* is available on the Queensland Government website at <u>www.qld.gov.au</u>, using the publication number (ESR/2018/4082) as a search term. <sup>4</sup> This can be a physical copy, an electronic copy or a link to the chief executive's <u>website</u> where this EOW code is available.

(6.4)	The <b>registered resource producer</b> must sample, measure and record the composition of the <b>resource</b> for the quality characteristics listed in <i>Requirement 6.3(e)</i> , on an annual basis as a minimum.	
(6.5)	All analysis required under this EOW code must be carried out by a laboratory that has <b>NATA</b> certification, or an equivalent certification, for such analyses.	
Record	ds	
(6.6)	The <b>registered resource producer</b> must keep the following <b>records</b> for the <b>resource</b> supplied to a <b>resource user</b> :	
	a) origin of the <b>resource</b> (e.g. address, lot on plan and/or GPS coordinates);	
	b) quantity (in litres) of the <b>resource</b> supplied;	
	c) quality of the <b>resource</b> (for the quality characteristics listed in in <i>Requirement 6.3(e))</i> ;	
	d) date of dispatch of the <b>resource</b> ; and	
	e) business name, <b>ABN</b> and address of the <b>person</b> receiving the <b>resource</b> .	
(6.7)	All <b>records</b> required to be kept by the <b>registered resource producer</b> under this EOW code must be:	
	a) kept by the <b>registered resource producer</b> for a period of not less than five (5) years; and	
	<li>b) provided to the chief executive upon request and in the format requested and time period specified.</li>	
Notifica	ation of emergencies, incidents and breaches	
(6.8)	Any breach of a requirement of this EOW code must be reported to the <b>chief executive</b> as soon as practicable and within 24 hours of becoming aware of the breach.	
(6.9)	<b>Records</b> of any breach of a requirement of this EOW code, including full details of the breach and any subsequent actions taken, must be kept and provided to the <b>chief executive</b> upon request and in the format requested and time period specified.	

### 7. Conditions of Use

Notific	Notification under this EOW code		
(7.1)	Prior to operating under this EOW code, a <b>person</b> who intends to use the approved <b>resource</b> must notify the <b>chief executive</b> by giving a notice in the approved form <sup>5</sup> at least 10 days prior to the commencement of using the <b>resource</b> .		
Approved resource and use			
(7.2)	The approved <b>resource</b> is <b>liquid concrete washout</b> which is used by a <b>resource user</b> in pH adjustment of acidic pond waters in accordance with the conditions of the relevant <b>environmental authority</b> held by the <b>resource user</b> for the <b>site of use</b> .		

<sup>&</sup>lt;sup>5</sup> The approved form, *Notification of use of a resource* is available on the Queensland Government website at <u>www.qld.gov.au</u>, using the publication number (ESR/2018/4552) as a search term.

Records			
(7.3)	The <b>resource user</b> must <b>record</b> the following information for the <b>resource</b> received by the <b>resource user</b> under this EOW code:		
	a) quantity (in litres) of the <b>resource</b> ;		
	b) date of receipt; and		
	<ul> <li>business name, ABN and address of the registered resource producer who supplied the resource.</li> </ul>		
(7.4)	All records required to be kept by the resource user under this EOW code must be:		
	a) kept by the <b>resource user</b> for a period of not less than five (5) years; and		
	<ul> <li>provided to the chief executive upon request and in the format requested and time period specified.</li> </ul>		
Notifica	Notification of emergencies, incidents and exceptions		
(7.5)	Any breach of a condition of this EOW code must be reported to the <b>chief executive</b> as soon as practicable and within 24 hours of becoming aware of the breach.		
(7.6)	<b>Records</b> of any breach of a condition of this EOW code, including full details of the breach and any subsequent actions taken, must be kept and provided to the <b>chief executive</b> upon request and in the format requested and time period specified.		

### 8. Definitions

Words and phrases used throughout this EOW code **in bold** are defined below. Where a definition for a term used in this EOW code is sought and the term is not defined within this EOW code the definitions provided in the relevant legislation shall be used.

**'ABN'** means Australian Business Number which is a unique 11 digit number issued by the Australian Business Register and identifies a business in Australia.

'chief executive' means the Department of Environment, Science and Innovation or its successor.

**'emergency(ies)'** means a situation where either human health or safety is threatened, or serious or material **environmental harm** has been or is likely to be caused; and urgent action is necessary to protect the health or safety of persons, or prevent or minimise the harm, or rehabilitate or restore the environment because of the harm.

**'environmental authority'** is a licence granted by the **chief executive** pursuant to the *Environmental Protection Act 1994* which authorises the holder of the environmental authority to carry out an environmentally relevant activity.

**'environmental harm'** means environmental harm as defined in Chapter 1 of the *Environmental Protection Act* 1994.

**'liquid concrete washout'** means water and slurry that is generated from the washing of concrete transport trucks, pumps, mixers and chutes, cleaning of agitator bowls and the hosing of yard paving at the **site of production**, and which is not reused in any concrete batching process.

'NATA' means the National Association of Testing Authorities.

'person' means an individual or a corporation.

**'records'** include breach notifications, written procedures, analysis results, monitoring reports and monitoring programs required under a condition or requirement of this EOW code.

**'registered resource producer'** means a **person** who produces the **resource** and has registered with the **chief executive** (in accordance with *Requirement (6.1)*) to use, sell or give away the **resource** to be used under this EOW code (e.g. a company operating a concrete batch plant from where the **resource** originates).

### 'resource' means liquid concrete washout.

**'resource user(s)'** means a **person** who has notified the **chief executive** (in accordance with *Condition 7.1*)) to receive the **resource** from a **registered resource producer** and uses the **resource** for a use approved under this EOW code and does so in such a manner which does not cause any **environmental harm** (e.g. a quarry or waste recycler receiving concrete from a **registered resource producer**).

**'safety data sheet'** means a document containing data regarding the properties of the resource which provides information on handling or working with that substance in a safe manner; and includes information such as physical data toxicity, environmental characteristics, health effects, first aid, reactivity; and storage, disposal, protective equipment and spill handling procedures. The safety data sheet must be compliant with Safe Work Australia's *Model Code of Practice: Preparation of safety data sheets for hazardous chemicals*.

'site of production' means the relevant location(s) where the **registered resource producer** produces the **resource** in accordance with this EOW code (e.g. a concrete batch plant).

'site of use' means the relevant location(s) where the resource user receives and/or uses the resource in accordance with this EOW code.

- END -

### Appendix A —General obligation for all persons

This appendix is not intended to provide a comprehensive assessment of all obligations under Queensland law. It provides some general information and persons are encouraged to familiarise themselves with all requirements related to their specific operation.

### Responsibilities under the Environmental Protection Act 1994

All persons within the State of Queensland must also meet their obligations under the *Environmental Protection Act 1994*, and the regulations made under that Act.

### General environmental duty

Section 319 of the *Environmental Protection Act 1994* (EP Act) states that we all have a general environmental duty. This means that we are all responsible for the actions we take that affect the environment. We must not carry out any activity that causes or is likely to cause environmental harm unless we take all reasonable and practicable measures to prevent or minimise the harm. To decide what meets your general environmental duty, you need to consider:

- the nature of the harm or potential harm
- the sensitivity of the receiving environment
- the current state of technical knowledge for the activity
- the likelihood of successful application of the different measures to prevent or minimise environmental harm that might be taken
- the financial implications of the different measures as they would relate to the type of activity.

More information is available on the Department of Environment, Science and Innovation website <u>www.des.qld.gov.au</u>.

### Some relevant offences under the Environmental Protection Act 1994

### Causing serious or material environmental harm (sections 437-39)

Material and serious environmental harm are defined in sections 16 and 17 of the EP Act. Material environmental harm is when the harm is not trivial or negligible in nature. Serious environmental harm is harm that is irreversible, of a high impact or widespread, or that is caused to an area of high conservation value or special significance. Damages, or costs required to rehabilitate the environment, of over thresholds amounts in the EP Act also constitutes material or serious environmental harm. Serious or material environmental harm excludes environmental nuisance.

### Causing environmental nuisance (section 440)

Environmental nuisance is unreasonable interference with an environmental value caused by aerosols, fumes, light, noise, odour, particles or smoke. It may also include an unhealthy, offensive or unsightly condition because of contamination.

### Depositing a prescribed water contaminant in waters (section 440ZG)

Prescribed contaminants include a wide variety of contaminants listed in Schedule 10 of the Environmental Protection Regulation 2019.

It is your responsibility to ensure that prescribed contaminants are not left in a place where they may or do enter a waterway, the ocean or a stormwater drain. This includes making sure that stormwater falling on or running across your site does not leave the site contaminated. Where stormwater contamination occurs you must ensure that it is treated to remove contaminants. You should also consider where and how you store material used in your processes onsite to reduce the chance of water contamination.

### Placing a contaminant where environmental harm or nuisance may be caused (section 443)

A person must not cause or allow a contaminant to be placed in a position where it could reasonably be expected to cause serious or material environmental harm or environmental nuisance.

### Some relevant offences under the Waste Reduction and Recycling Act 2011

### Littering (section 103)

Litter is any domestic or commercial waste and any material a person might reasonably believe is refuse, debris or rubbish. Litter can be almost any material that is disposed of incorrectly. Litter includes cigarette butts and drink bottles dropped on the ground, fast food wrappers thrown out of the car window, poorly secured material from a trailer. However, litter does not include any gas, dust, smoke or material emitted or produced during, or because of, the normal operations of a building, manufacturing, mining or primary industry.

### Illegal dumping of waste (section 104)

Illegal dumping is the dumping of large volumes of litter (200 litres or more) at a place.

### Failure to comply with EOW code (section 158)

A registered resource producer for an EOW code must not use, sell or give away the resource unless the registered resource producer complies with the requirements of the EOW code relating to the resource.

A person, other than a registered resource producer, must not use a resource in a way, or for a purpose, that does not comply with an EOW code for the resource.
