on the map are specific to developed areas in the Mackenzie River catchment. The Central Queensland Map Series presents the distribution of developed areas, such as "Mackenzie" and "Fitzroy." The map highlights "Callide Creek Catchment" as part of basin 120. Refer to the "Central Queensland Map Series" for a comprehensive view. The "Environmental Protection (Water) Policy 2009" from the Queensland Government is noted, particularly "WQ1306 - Callide Creek Catchment." The map is designed to reflect the environmental and natural features of this area. The "Location Map" is a supplemental feature for regional context. The "Key to Environmental Values" is provided to explain various symbols and features on the map. The "Note" section contains additional details about the map's purpose and scope. The "Scale" is 1:1,000,000, and the "Projection Details" are provided for cartographic accuracy. The "Legend" outlines the map's symbols and their meanings. The map is a valuable resource for understanding the environmental and geographic context of the Mackenzie and Fitzroy areas.
